

Olveston Parish Council: Vision Statement

Olveston Parish Council aims to provide an active and reliable organisation to meet the needs of the parish through its commitment, awareness of others' needs and effective communications within and outside the area.

It seeks to promote, maintain and improve a good quality of life by efficient maintenance of services and keen oversight of the needs of groups and individuals within the parish by making efficient use of the precept (annual financial allowance). It will also strive to be pro-active in the introduction of measures that will enable the community as a whole to live healthily and safely together.

The council will attempt to maintain strong links beyond the parish, especially with South Gloucestershire Principal Authority, where they will always attempt to represent the interests of the parish.

The council will make regular use of all means at their disposal to inform and communicate with parishioners so that all council's business is unambiguously represented in the public eye.
